Can you believe that the first quarter of this year has gone by so quickly, and so many great events are yet to happen? We began the year on the hard work and dedication of **LEAD Chairman Darryl LeDoux** and his committee. Through their efforts, the chapter held its 50 annual **St. Patrick's Law Enforcement Appreciation Day** on March 17th 2006 at the San Francisco Airport Marriott Hotel. This event started this special anniversary year off right and turned out to be quite an exceptional event with over 200 people in attendance. We were happy to have so many of our Law Enforcement counterparts able to join us for this event.

Now we are ready to look forward at the great events scheduled for the next two months. The monthly **Virtual Forums** will be set at Strategic Security for the rest of the year. Come join the chapter as we take advantage of the timely training and topics that ASIS international has put together for the membership on the second Wednesday of every month. Our April 20th membership meeting will be held at Yahoo's Sunnyvale Facility. We have a wonderful speaker planned, **Mr. James Connor**, Global Systems Manager, Symantec corporation, who will be talking to us about **System Convergence Issues**. This is a very timely topic that I am sure every Security Professional is currently facing.

This brings us to our premier chapter event of the year, the **34th Annual Seminar and Exhibits**. This year will be a new experience for us, in that we will be combining our training with the **Silicon Valley Chapter of HTCIA** annual 3 day training. The event will take place May 8 to 10 at the Santa Clara Convention Center. We are excited about this blending of the two major industry groups in the Bay Area, with a potential of over 600

attendees to the training and exhibitions . The HTCIA Silicon Valley Training Conference is known for its superb content, organization and added value. The conference has three days of break-out sessions where you will have the opportunity to select from many topics of general and special interest such as: Internet Crime / Cybercrime, Legal Updates, Network Security, Terrorism and Homeland Security. All of our presenters and instructors are leaders in the high technology crime and homeland security arena. This course is **MCLE** and **POST** certified as well as eligibility for **ASIS recertification** credit. We have planned some surprises for this years event, so please take the time to join us. We have arranged for both Jeff Spivey, President of ASIS International for 2006, and **Congresswoman Zoe Lofgren** to speak during our Tuesday Luncheon. With all the new additions to this year's event, I am sure we will raise the bar for all future events and create a flag ship event for both organizations going forward.

With all these changes happening over the next few months, the chapter will have a lot of exciting events to participate in. On behalf of the Executive committee, we hope to see you at one of the upcoming events.

Respectfully,
Curtis Given, CPP
